## EXPERIENCE

**General Assembly**, New York, NY

**June 2015 – Sept. 2015**

Web Development Immersive | Web Developer

**Foodie** - *A pantry management application designed to reduce food waste by keeping track of user's refrigerator and pantry contents*

- Displayed user food profile dynamically with jQuery and AJAX
- Managed user accounts and sessions with Bcrypt and Ruby on Rails
- Alerted users of approaching food expiration dates through notifications and emails using JavaScript and the Action Mailer API

**Task It** - *An online task planning application*

- Implemented geolocation and mapping of task location using the Google Maps API
- Collaboratively developed logic allowing users to send private messages to other users and send invitations for shared tasks
- Integrated weather forecasts for users according to their task dates and locations using a weather forecast API

**Balance** - *A public forum for members of the repetitive strain injury community to discuss topics of wellness*

- Developed a RESTful application using JavaScript and Express.js
- Implemented an algorithm that displays the most relevant posts based on user's votes
- Seeded SQLite database with topic threads for user discussion
- Achieved nested database calls that allowed users to comment on the posts of other users using SQLite schema files.
